

Do your bit,  
Keep it  
Natural!

# REDUCE YOUR FOOTPRINT

Hi I'm Arbi,  
We all know how important it is  
to reduce our carbon footprint.  
It's easy...just choose to use our  
Eco Natural paper!  
Come help me transform your  
washrooms in an environmentally  
friendly way!  
Thanks  
Arbi

Have you considered how you can reduce your environmental footprint in your washroom and reduce your carbon?

None of us want our milk, orange juice or soup cartons ending up in landfill or incineration. I have a super way of giving cartons a second life. I can transform them into exciting new & useful paper products such as kitchen towels, facial tissues, toilet tissue, hand towels and dairy wipes.

The Eco Natural paper is naturally friendly.

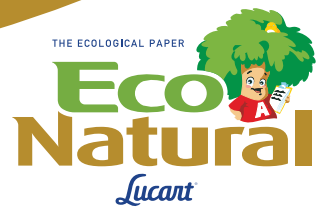

There is no added bleaching, colourings or dyes & no compromise on quality in this 100% recycled product.

Everything is recycled - the fibre board, the plastic caps & the aluminium liners.

We can even measure it, using the 'Environmental Savings Calculator'.

WE CAN MEASURE YOUR CARBON SAVING!

# ECO TECHNOLOGY

Eco Natural Wall Cards to help explain the benefits to your staff and customers of using Eco Natural paper.

## THE FIRST PAPER FROM BEVERAGE CARTONS

Eco Natural Lucart products are made by recycling cellulose fibres found in beverage cartons.

## CLEAN AND ZERO-WASTE TECHNOLOGY

Apart from cellulose fibres, cartons contain plastic material and aluminium. Thanks to the innovative Lucart Group technology, these materials are not thrown out but are recycled in other manufacturing activities.

## THE ENVIRONMENT IS RESPECTED

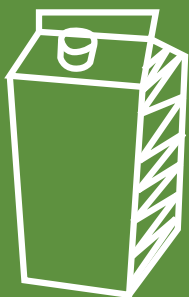

Eco Natural Lucart does not cut down trees but recycles materials that would otherwise end up in a rubbish dump. This productive process takes place thanks to a mechanical action that physically separates material without using damaging substances for man and the environment.

# ENVIRONMENTAL SAVINGS CALCULATOR

Lucart Professional has developed an environmental savings calculator which helps measure the environmental impact of switching from your current paper products to using Eco Natural products instead.

The key areas that this calculator measures include:

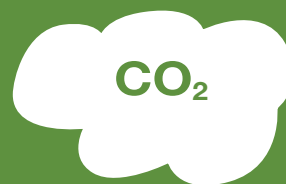

### 1. RECOVERED

27,076,521  
post-consumer  
beverage cartons\*

### 2. SAVED

10,703  
average  
sized trees\*

### 3. AVOIDED

708,110kg  
of CO<sup>2</sup> emissions\*

The above figures are based on the volume of Econatural paper products used in Ireland up to January 1st 2019

# Eco Natural Washroom Systems

## Identity Hands Roller Towel

Single Sheet Dispensing Keeps Costs Under Control

- Fast & easy to Fill
- Transparent easy to see consumption
- Hygienic-Cuts down the risk of cross contamination
- Dispensers Available in White & Black
