

r-MicronSolo

Cloth is made from 35% recycled material

Product Description

r-MicronSolo is Vileda Professional's single use cleaning cloth made from 35% recycled materials. Due to its advanced micronfibre technology, it offers an effective and rapid cleaning of high-risk areas. The highly absorbent cleaning cloth especially suits demanding cleaning tasks in hygienically sensitive areas due to its proven ability of bacteria and virus removal by up to 99.99% on all surfaces.

r-MicronSolo's single use character helps to avoid the risk of cross-contamination. The colour coding system R/B/G/Y allows a simple differentiation of the wipes and therefore accommodates a cleaning process according to hygiene standards and HACCP principles. The excellent absorbency of r-MicronSolo allows to clean big spills in one wipe and removes even grease dirt from delicate surfaces like ceramics or glass.

Application area

The advanced micronfibre technology promises rapid and effective cleaning of high-risk areas, while removing up to 99.99% of viruses and bacteria on different surfaces. Even delicate materials such as glass or ceramic can be cleaned with r-MicronSolo without leaving any damage or marks. Due to the high absorbency of the r-MicronSolo cleaning cloth, big spills and stubborn dirt like grease are cleaned with ease. The new recycled wipe Roll is perfectly suitable for health care applications as well as for General Building Cleaning or hotels.

Advantages

- Maximum single use hygiene
- Removal of 99.99% of viruses and bacteria – as certified by independent test institutes

- Superior micronfibre cleaning performance
- Made from 35% recycled materials
- Excellent absorbency for good spill pick up in one wipe
- Efficient dirt removal – even of grease dirt
- Colour coding system for simple differentiation of wipes and individual adaption to hygiene system
