ULTRA BIG BLUE

AT A GLANCE

Easy to use - simply drop in the toilet cistern

Long lasting - up to 900 flushes

Creates slippery surface on the toilet pan to prevent debris sticking

Displaces water in your cistern - reducing usage

Beneficial bacteria consume bio materials to reduce odours

For a fresh, sparkling toilet between cleans

This bio-enzymatic cleaner has redesigned packaging to make it easier to fit in a wide variety of toilet cisterns. It lasts for up to 900 flushes and has increased surfactant concentration so it cleans better than ever whilst reducing your water consumption by displacing water that would normally be present in your toilet cistern. Ultra Big Blue releases billions of beneficial bacteria to consume bio-materials that cause odours, keeping your bowl clean, blue and fresh between cleans.

Easy to use Thanks to it's small size, the Ultra Big Blue fits nearly any toilet tank. No setup or mixing required, just drop it into the tank! Long lasting Lasts up to 900 flushes even with it's compact foot print. Your toilet will automatically stay clean thanks to enzymes released with each flush. Safe to use - Bio-enzymes released with each flush consume malodors and help promote bio-degradability.
